

# Brain Tumors

Brain tumors are abnormal growths of cells within the brain or central nervous system. They may be **primary** (originating in the brain) or **metastatic** (spread from other organs), and can be benign or malignant.

## Types

- Glioblastoma
- Astrocytoma
- Meningioma
- Oligodendroglioma
- Ependymoma
- Medulloblastoma

## Location of Different Types of Brain Tumour

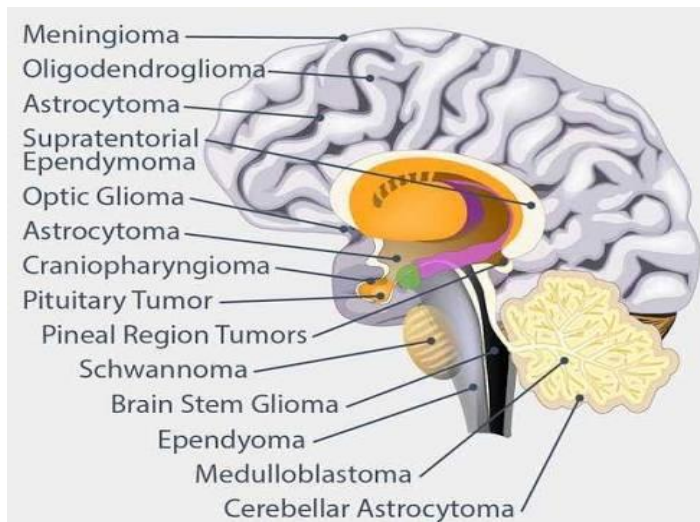

This slide is 100% editable. Adapt it to your needs and capture your audience's attention.

## Brain Regions

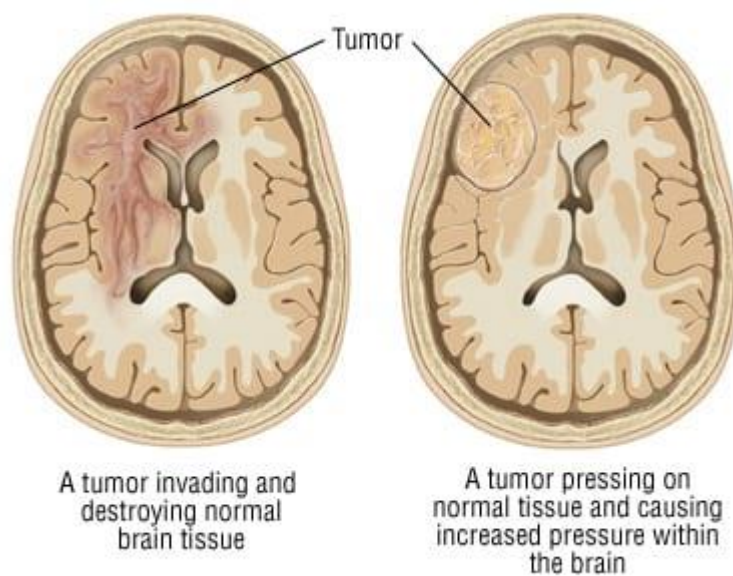

Depends on tumor location:

- Frontal lobe
- Temporal lobe
- Parietal lobe
- Occipital lobe
- Cerebellum
- Brainstem

## Pathophysiology

- DNA mutations
- Uncontrolled cell proliferation
- Angiogenesis
- Tumor invasion
- Increased intracranial pressure

## Genetics

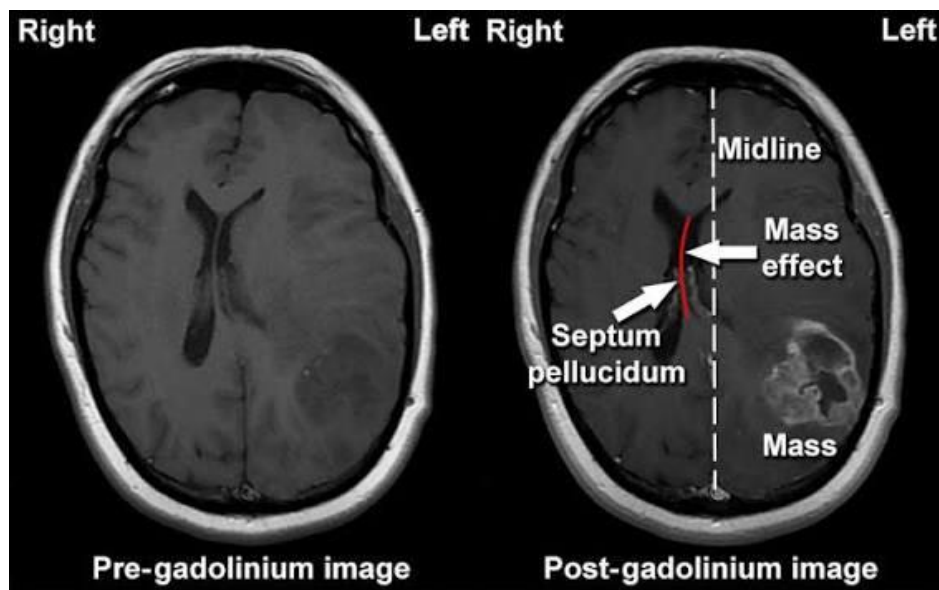

- IDH1
- TP53
- EGFR
- ATRX
- MGMT

## Symptoms

- Headache
- Seizures
- Weakness
- Vision changes
- Memory problems
- Personality changes

## Diagnosis

- MRI
- CT
- Biopsy
- Histopathology

## Treatment

- Surgery
- Radiation
- Chemotherapy
- Targeted therapy
- Immunotherapy
